Professional Summary

Backend engineer with 4+ years building Java microservices for a multi-tenant retail SaaS platform used by 5 tenants across Latin America. Core contributor to Order Management, Product Information Management, and integrations with 5 marketplaces including MercadoLibre and Shopify.

Technical Skills

Languages: Java, Python, JavaScript, SQL
Frameworks: Spring Boot, Spring WebFlux, Spring State Machine, JUnit 5, Mockito, Testcontainers
Data & Messaging: Apache Kafka, Amazon SQS, Apache NiFi, Couchbase (N1QL), PostgreSQL
AI Agent: RAG, Agentic Workflows
Cloud & DevOps: AWS (S3, Lambda, EventBridge, SQS), Docker, Kubernetes, Jenkins, Gradle, SonarQube
Architecture: Microservices, Event-Driven Design, REST APIs, Camunda Workflow Orchestration, Reactive Programming

Experience

Clover Bay Technologies Pvt Ltd Bengaluru, India

Software Development Engineer – 2 Apr 2026 – Present

- **Product Compatibility Platform** — Designed and shipped a product compatibility platform within the PIM, enabling retailers to define and query fitment relationships across the full catalog.
- **Platform Tooling** — Published an internal **Spring Kafka library** standardizing consumer config, retries, and **dead-letter-topic routing**, adopted by 3+ services.
- **Fulfillment Automation** — Automated **pack/ship/deliver** workflows, **Siigo invoicing**, and **MercadoLibre fiscal documents**, saving 24 hours of manual operations work.
- **Technical Leadership** — Run design reviews and mentor 2-4 engineers on distributed systems and event-driven patterns.

Software Development Engineer – 1 Jul 2024 – Mar 2026

- **Promotion Module** — Owned the module end to end: domain model, API contracts, and **Spring State Machine** workflows. Automated promotion propagation across sales channels with auditable state transitions.
- **Streaming Export Pipeline** — Built catalog exports with **Apache POI SXSSF/SAX**, paginated **Couchbase** queries, and async **Kafka** processing. Scaled exports from a 10K-row ceiling to **100K+ rows at constant memory**.
- **Marketplace Integrations** — Built **Shopify** and **MercadoLibre** connectors using webhooks, **Kafka**, and **GraphQL/REST**. Synced 100+ orders/day in real time, including **Siigo invoicing** with Colombian tax compliance.
- **Query Performance** — Cut **P99 latency from 2s+ to sub-second** using **N1QL** execution-plan analysis, **covering indexes**, and connection-pool tuning.

Associate Software Development Engineer Jul 2022 – Jun 2024

- **Fulfillment Resilience** — Built a **Camunda**-orchestrated backorder pipeline with dynamic warehouse routing, **circuit breakers**, and retries. Reached **99%+ fulfillment reliability** and removed manual intervention for 5 tenants.
- **Bulk Ingestion** — Designed an upload pipeline on **S3, Lambda, EventBridge, and SQS** processing 10K-row Excel files in **Kafka** batches with tenant isolation.
- **Testing & Quality** — Set up **Testcontainers** and **JUnit 5/Mockito** testing, raising coverage from 50% to **75%+**.

Projects

- **Conversational Product Search Agent (POC)** — Built a **LangGraph** search agent with **Qdrant vector search**, **Groq LLM inference**, and multi-turn session state. Answers natural-language product queries over a catalog of items using **RAG**.

Education

N.M.A.M Institute of Technology, B.E. in Computer Science — CGPA: 8.74 / 10 2018 – 2022
